ABOUT THE FIRETECH® BRAND

BY HIZIZ LED LIGHTING®

WE HELP FIRST RESPONDERS WORK MORE SAFELY AND EFFECTIVELY AFTER DARK, **SO THEY CAN SAVE LIVES.**

We do this by providing reliable lighting technologies for emergency vehicles. Our team is dedicated to developing the most innovative, durable, and high performance lighting products on the market.

MORE LIGHT

With the highest luminous efficacy on the market, our fixtures produce more lumens per watt than others on the market. That means more light where you need it, every single time.

BETTER LIFETIME WARRANTY

Our fixtures are built to last. Therefore, HiViz is proud to offer a lifetime warranty with advance exchange on all FireTech products. Advance exchange means that we ship you a new fixture first and then you send us the old one back after the swap. We can't promise that you'll never have a problem, but we can promise that we'll take care of it if you do.

SAME COST

Lumen for lumen, HiViz fixtures beat the competition in both performance and price. What does this mean? You get the light output you deserve at a price point you can afford.

DEVELOPED BY FIRST RESPONDERS

We've responded to roadside emergencies in the middle of the night, so we know the challenges that you face. Our team is comprised of first responders and we take our real world knowledge into account when designing and engineering our products.

LIGHTING QUALITY AS A PRIORITY

INGRESS PROTECTION

Products are sprayed from close distances with 80~100 bar water pressure to verify the ingress protection rating, ensuring they are sealed properly.

SUBMERSION & AGING

Every light is run through a submersion (water dunk) test, then placed onto an aging rack and powered up for 30 minutes.

THERMAL IMPACT

Products are placed in a -40°C chamber for 30 minutes and then placed in an 80°C chamber for an additional 30 minutes. Products are then powered up for 72 hours.

LONG TERM DURABILITY

Products are switched on and off 150,000 times repeatedly to ensure they remain functional after all testing.

CONSUMPTION & INPUT RANGE

All products are tested with a digital power meter to ensure they are consuming the correct amount of power and have no electrical faults.

CUSTOM LIGHTING SPEC

WE'LL CREATE PERSONALIZED RECOMMENDATIONS SPECIFIC TO YOUR APPARATUS

WHAT TO EXPECT:

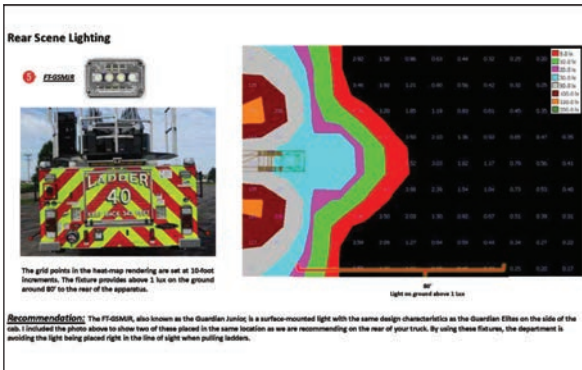

2D BLUE PRINT

We begin each project with a customer/dealer-provided drawing of the rig to be outfitted, as well as a quick conversation with the customer on the duties of the particular rig and the response district.

3D MODEL

A 3D model is built using the customer's specifications then carried over into the rendering engine.

SIMULATION RENDER

A simulation rendering ensures the final product will meet the customer's lighting requirements, as well as any applicable agency standards.

CUSTOM SOLUTION

We create a complete breakdown of the customer's specific needs to meet their safety requirements.

REALISTIC AND ACCURATE LIGHTING SPEC

Spec'ing a new rig and don't know where to begin? Send your drawing to have our team recommend a layout! This service doesn't cost anything and it's a great way for you to ensure efficient and thoughtful placement of scene lights around your rig!

Our team can typically produce a detailed rendering within five to ten business days, if provided proper vehicle specifications.

GET YOUR CUSTOM LIGHTING SPEC

Fill out this worksheet and text a picture of it to **(703) 662-3458** or email it to **firetech@hivizleds.com** and we'll send you your custom fit out guide.

HARDWARE NOW. **SOFTWARE OVER AND OVER.**

In a manufacturing environment where long backlogs and lengthy production lead times are the new norm, choosing a lighting system that can be updated over time helps to ensure you don't miss out.

HiViz Connect™ is the communication protocol that enables smart features in our new HVC Warning Lights. With HiViz Connect, our hardware products become virtually future-proof: feature enhancements and updates can be downloaded and sent to your warning lights without ever having to take them off the truck. We took our inspiration from some of the most forward-thinking car manufacturers in the tech space, and have designed a feature set that become exponentially advanced with time. The best part? There's no expensive central brain box. It's all built into the fixtures and does not require a secondary electrical system to be installed on your apparatus.

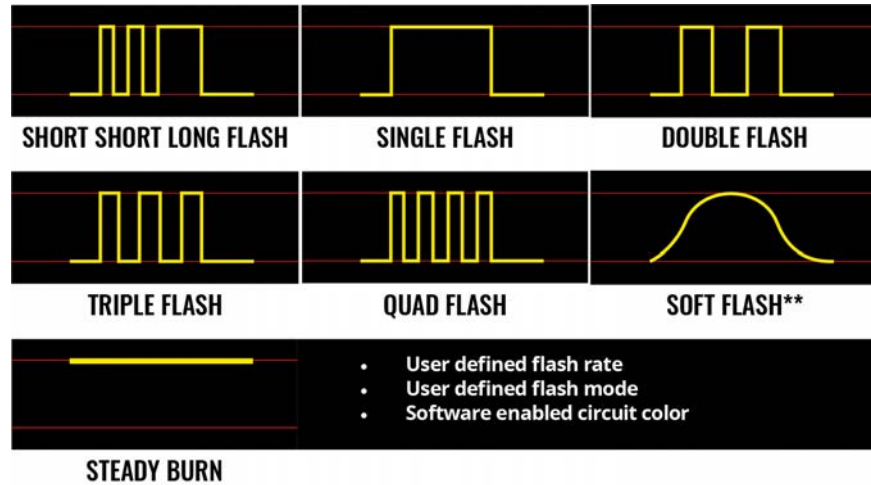

The ability to update the software wirelessly will allow us to roll out updates keeping your truck up-to-date. With HiViz Connect, you can spec FireTech® today and receive the latest features the day your truck is ready to ship.

HiViz **CONNECT™**

ADVANCED FLASH PATTERN PROGRAMMING

HiViz Connect™ enables features like dimming, ramping, and virtually unlimited flexibility in flash pattern selection.

MULTI-VEHICLE SYNCHRONIZATION*

Quickly becoming a requirement in many regions, stay on top of new safety regulations with synchronizing flash patterns and rates across vehicles.

ACTIVE LOAD MANAGEMENT

Firefighters should never have to work in the dark. Active load management ensures the scene and warning light fixtures never consume more power than the alternator has capability to produce. This allows for the lights to be dimmed rather than just switched off if electrical system capacity is exceeded.

AUTOMATIC SYSTEM-WIDE NIGHT MODE

Night modes have been recognized in NFPA 1900 as a possible way to reduce chaos and calm the emergency scene. HiViz Connect-enabled products automatically enter night mode, slowing the flash rate and reducing intensity for the entire system with no user input required.

INTEGRATED DIGITAL ALERTING*+

By transmitting data in to the HAAS Alert Safety Cloud®, millions of motorists have the ability to receive a digital notification when you are responding on scene to make the roads safer for all.

* Feature to be released in future software updates

**All Soft Flash patterns include an interval where the light emission turns completely off

+Requires active HAAS Alert subscription and optional hardware package (included with most new apparatus at no cost)

OMEN™ WARNING LIGHTBARS

24"-84" HIVIZ CONNECT™ CONFIGURED WARNING LIGHT FIXTURES

OMEN™

KEY FEATURES

- Four primary operational modes: responding day, responding night, on-scene day, and on-scene night
- Automatic night modes: apparatus-wide night mode eliminates the need to individually program fixtures
- Every color, every time: every FireTech® OMEN lightbar comes fully populated with red, green, blue, amber, and white LEDs in the middle row
- One part number per size: gone are the days of crazy part numbers, just choose your lightbar length and that's it
- App-configurable: lightbar will be configurable via phone app*

* Coming soon for Android and iOS

THE OMEN WARNING LIGHTBAR

Every FireTech OMEN lightbar comes fully populated with every color in the middle row. This reduces complexity and eliminates the need for you to spend time in a configurator prior to spec'ing your apparatus. Choose your length, mounting location, and whether or not you want to add a FireTech brow light then let the truck manufacturer do their thing. No need for spare modules and internal parts of warning lightbars. With the OMEN, you can focus on the job at hand.

FT-HVC-OMEN-6	6" OMEN Half Beacon, Red LEDs, RGBAW Center Row, HiViz Connect Enabled. 180 Degree Illumination.

DIMENSIONS

ALL NEW DESIGN & NEW FEATURES

In 2024, there's no need to have access to the internal central brain of a lightbar. In fact, with the OMEN™, there is no center at all. Rotators and giant pieces of plastic are a thing of the past. Unlike older lightbar designs, it's impossible for the center of the FireTech® Omen Lightbar to fill with water - It's like a bucket without a bottom. It was designed with a modern exoskeleton and multi-color modules to give the ultimate flexibility while maintaining a super simple design.

SAY GOODBYE TO MOISTURE ISSUES

Moisture problems? Not with the FireTech Omen! Moisture is one of the two main killers of lighting products on fire apparatus. Like all FireTech fixtures, mechanically affixed venting mechanisms allow our factory sealed housings to breathe and remain at a neutral pressure.

MODULAR DESIGN

The traditional 1980's lightbar design focused on serviceability of internal components. We stepped away from that, building from the ground up to create the first truly modular design using maintenance-free semiconductor tech. With our design, you can configure or replace any size traditional lightbar with the FireTech OMEN. If you damage the bar, the modular design also allows you to replace a modular rather than the whole fixture - reducing cost and the need for spare parts.

COMMAND ON DEMAND™

Command On Demand functionality turns your lightbar and any fixtures with green LEDs on the apparatus to a steady burning green at the press of a button!

AUTOMATIC NIGHT MODE

Night modes are a hot topic in the fire service today. The OMEN™ Warning Lightbar uses two strategically placed optical sensors to calculate proper intensity. Redundant sensors compare data to prevent false positives and provide more reliable day/night mode selection. What is the best part? The mode setting is global to all fixtures connected to the system, so no need to program fixtures day/night modes individually!

WATER LEVEL OR CHARGE STATUS INDICATOR*

Never get caught unaware of your water levels again.

* May require additional hardware, feature to be enabled in future software update

HVC GUARDIAN® WARNING LIGHTS

SURFACE-MOUNTED SMART WARNING LIGHTS

KEY FEATURES

- Side-firing LEDs
- Crack-proof corners
- HVC system control
- Software updatable design

THE ULTIMATE SURFACE-MOUNTED WARNING LIGHTS

The HVC Guardian warning lights are the perimeter workhorse of the “Smart” HVC lighting range. They communicate using the intelligent single-wire automotive protocol with the OMEN lightbar and are designed to complement the OMEN by extending its core functions to the perimeters of the apparatus. HVC Guardian fixtures can execute ramping, dimming, and single or dual color operation based on user-selectable programming.

Physically, the HVC Guardians start with the same FireTech® durability and protection from heat and moisture (the top two killers of LEDs) that you’ve relied on for years. They are the only fixtures in their class to feature a full-sized aluminum heat sink, keeping the fixture cooler and less likely to overheat. Crack-proof corners mean the lens never comes into the contact with the mounting hardware, preventing cracks and lessening the risk of moisture intrusion. As an added protection, our HiViz Connect™ Guardian series warning lights are covered by our industry-leading Advance Exchange Lifetime Warranty. These lights also have the same physical footprint as our Guardian/Guardian Elite and Guardian Junior scene lights: side by side on an apparatus, they look like an intentionally matched pair.

These lights are infinitely updatable with virtually unlimited flash patterns and feature forward-facing single or dual color LEDs with chrome reflectors for high intensity light output. The side-firing LEDs are a new feature, illuminating the side of the truck to increase visibility and to project 180-degrees for off-axis viewing – making the HVC Guardian series warning lights the widest-throwing surface-mounted warning lights in the industry.

GUARDIAN & GUARDIAN JR OPTIONAL ACCESSORIES

GUARDIAN RETROFIT GASKET

ADD -RGKIT TO THE END OF P/N

For replacing legacy fixtures that had a different sized cutout/bolt pattern. Covers old or oversized holes in the apparatus body.

HVC ZONE MODULE

P/N: FT-HVC-ZONEMODULE

Allows CAN/LIN communication between the OMEN lightbar and HVC Guardian warning lights on the body of the apparatus.

BEZEL DELETE GASKET

ADD -BDKIT TO THE END OF P/N

Allows for the installation of Guardian light without the chrome bezel for a reduced mounting profile.

GUARDIAN JR HEADLIGHT AREA MOUNTING BRACKET

P/N: P-4X6-GSMJR-PLATE

Mounting plate for mounting a Guardian Jr warning light in a headlight mounting area.

WHY CHOOSE THE GUARDIAN® SERIES?

BACKED BY THE FIRETECH® LIFETIME WARRANTY

CRACK-FREE CORNER DESIGN

Screws never come in contact with the lens, preventing cracking and moisture intrusion. They're so strong you can hang a Hummer from them!

SEE FULL
VIDEO HERE!

SIDE-FIRING LEDs

Viewing angle matters, and more angles means more visibility - especially on winding roads. The HVC Guardian warning lights feature both forward-facing LEDs, plus side-firing LEDs that illuminate the side of the truck, making the truck more visible to other drivers. Parking off-angle? We've got you covered.

PRECISION LINEAR OPTICS

Using a linear optic, this fixture can generate an ultra-wide beam that is visible for miles.

BACKED BY THE FIRETECH® LIFETIME WARRANTY

HIGH PERFORMANCE ALUMINUM HEAT SINK

Excessive temperature is the #1 killer of LED products in the public safety industry. Most warning lights are designed with a thin plate of sheet metal behind the LEDs. Instead, we use an oversized aluminum heat sink which keeps the fixture cooler. A cooler fixture means you're less likely to need our warranty. But if you do, we've got your back for life.

WIRELESS CONNECTIVITY

Configure features and settings from a smartphone app, or leverage wireless smart synchronization limiting the need to re-run wiring during apparatus retrofit.*

NITTO TEMISH VENT

The second most common killer of LED lights in the industry is moisture. Our Nitto TEMISH Vent allows moisture to vent ensuring no unwanted condensation or water droplets are trapped in the lens. The combination of crack-proof corners and the TEMISH vent allows you to leave your worries at the station.

* Coming soon

GUARDIAN® G-SERIES LIGHTS

COMPACT EXTERNAL WARNING LIGHTS

KEY FEATURES

- Multi-unit synchronization in simultaneous or alternating flash
- Super low-profile thickness
- Vibration resistant design

SMALL BUT MIGHTY

Thin, bright, and built to last: the FireTech® G-Series warning lights are an aluminum warning light that fits virtually anywhere. The G14 and G25 fixtures are available in two sizes and either single or dual configurations. On a fire apparatus, these fixtures can be installed in the rub rail, on the bumper, or in other areas where small form factor is required and durability is key. Additionally, these fixtures can be set to steady burn and be controlled by a variety of water level indicator driver modules, or “smart” lighting systems with user programmable outputs.

If you’re building a QRV, patrol car or any other vehicle where space is limited, the FireTech G-Series is designed to help you help others. The G25 is available in a dual color configuration, while the G14 is a single color configuration. Each fixture ships with a chrome bezel. Blackout bezels are available as an optional accessory as seen below.

G-SERIES OPTIONAL ACCESSORIES

G14 BLACKOUT BEZEL
P/N: P-G14-BOBEZEL

Black replacement bezel for FireTech Guardian G-Series G14 warning light.

G25 BLACKOUT BEZEL

4X6" HEADLIGHTS

PURPOSE BUILT FOR EMERGENCY VEHICLES

KEY FEATURES

- Direct replacement for existing headlights
- Integrated halo/park lamp
- DOT/FMVSS 108 compliant

DOT COMPLIANT HEADLIGHT FUNCTIONS (4 PIECE KIT EXAMPLE)

DESIGNED FOR EMERGENCY SERVICES

FireTech® LED headlights are a simple way to dramatically boost the total light output of your emergency vehicle. Utilizing long range IRIS Reflector technology, the FireTech LED headlight is able to push the light from the high beam LEDs to surprising distances. The reflector for the low beam LED was engineered to produce a wide beam pattern to cover the entire roadway. Each beam is precisely positioned to keep light from impairing on-coming drivers vision. Two elliptical beam LEDs in each headlight are aimed to cascade in front of and to the sides of the vehicle, increasing safety while driving and on scene.

HEATED 4X6" HEADLIGHT

The FireTech® heated LED headlights utilize a heated glass lens which is around 7X more thermally conductive than polycarbonate or other plastics. This lens allows more heat transfer from the heating element to the surface of the lens, which results in faster and more efficient headlight defrosting. The heating element is temperature activated, which prevents it from wearing out during warmer weather conditions. With its durable silver heating element, the headlight is designed for repetitious high temperature cycles in extreme environments.

GUARDIAN® JR TAIL LIGHT ASSEMBLY

PURPOSE-BUILT FOR EMERGENCY VEHICLES

KEY FEATURES

- Same Industry-Standard Footprint and Bolt Patterns as Legacy Technology Produced by Other Manufacturers
- DOT Compliant Tail Light Modes
- Can Be Purchased in Kits or Individual Fixtures

2 Flash Patterns

7 Flash Patterns

On / Off

STOP/TAIL, TURN, BACKUP LIGHTS

The Guardian® Jr Stop/Tail, Turn, and Backup lights are an expansion of the Guardian series of fixtures. They can be purchased individually (Stop/Tail, Turn, or Backup), or can be purchased in kits with triple and quad tail light housings. These fixtures are an economical addition to your apparatus which allows you to choose all fixtures from one lighting manufacturer for your whole apparatus, all backed by the industry's first Lifetime Advance Exchange replacement warranty.

CHROME BEZEL PART NUMBERS & DESCRIPTIONS	FT-TL-GSMJR-STT	Guardian Jr Stop/Tail Light. Red Lens. Red Leds. Dim Running Light, Bright Stop Light.
	FT-TL-GSMJR-BACKUP	Guardian Jr Backup Light. Clear Lens. White Leds. On/Off White Light.
	FT-TL-GSMJR-TURN	Guardian Jr Turn Signal Light. Amber Lens. Amber Leds. Arrow & Other Functions.
	FT-TL-GSMJR-6KIT	Complete Set Of 2 Stop/Tail Lights, 2 Turn Lights, & 2 Backup Lights. Includes 6 Chrome Bezels.
	FT-TL-GSMJR-TRIPLE-KIT	Complete Set Of 2 Triple Tail Light Housings. Includes Stop/Tail, Turn, & Backup Lights.
	FT-TL-GSMJR-QUAD-KIT	Complete Set Of 2 Quad Tail Light Housings. Includes Stop/Tail, Turn, & Backup Lights.
	FT-TL-GSMJR-QUAD-KIT-RED	Complete Set Of 2 Quad Tail Light Housings. Includes Stop/Tail, Turn, Backup, & Red Guardian Jr Warning Lights.
	FT-TL-GSMJR-QUAD-KIT-AMBER	Complete Set Of 2 Quad Tail Light Housings. Includes Stop/Tail, Turn, Backup, & Amber Guardian Jr Warning Lights.
	FT-TL-GSMJR-QUAD-KIT-BLUE	Complete Set Of 2 Quad Tail Light Housings. Includes Stop/Tail, Turn, Backup, & Blue Guardian Jr Warning Lights.
	FT-TL-HVC-GSMJR-QUAD-KIT-RED	Complete Set Of 2 Quad Tail Light Housings. Includes Stop/Tail, Turn, Backup, & Red "Smart" Guardian Jr Warning Lights.
	FT-TL-HVC-GSMJR-QUAD-KIT-AMBER	Complete Set Of 2 Quad Tail Light Housings. Includes Stop/Tail, Turn, Backup, & Amber "Smart" Guardian Jr Warning Lights.
	FT-TL-HVC-GSMJR-QUAD-KIT-BLUE	Complete Set Of 2 Quad Tail Light Housings. Includes Stop/Tail, Turn, Backup, & Blue "Smart" Guardian Jr Warning Lights.
	P-GSMJR-BEZEL	1 Chrome Bezel.
	P-GSMJR-BEZELKIT	1 Chrome Bezel With Foam Perimeter Gasket & Mounting Hardware.
FT-TL-GSMJR-TRIPLE-HO	Individual Triple Bezel Kit With Foam Perimeter Gasket & Mounting Hardware.	
FT-TL-GSMJR-QUAD-HO	Individual Quad Bezel Kit With Foam Perimeter Gasket & Mounting Hardware.	
BLACK BEZEL PART NUMBERS & DESCRIPTIONS	FT-TL-GSMJR-6KIT-B	2 Stop/Tail Lights, 2 Turn Lights, & 2 Backup Lights. Includes 6 Black Bezels.
	FT-TL-GSMJR-TRIPLE-KIT-B	Complete Set Of 2 Triple Tail Light Black Housings. Includes Stop/Tail, Turn, & Backup Lights.
	FT-TL-GSMJR-QUAD-KIT-B	Complete Set Of 2 Quad Tail Light Black Housings. Includes Stop/Tail, Turn, & Backup Lights.
	FT-TL-GSMJR-QUAD-KIT-RED-B	Complete Set Of 2 Quad Tail Light Black Housings. Includes Stop/Tail, Turn, Backup, & Red Guardian Jr Warning Lights.
	FT-TL-GSMJR-QUAD-KIT-AMBER-B	Complete Set Of 2 Quad Tail Light Black Housings. Includes Stop/Tail, Turn, Backup, & Amber Guardian Jr Warning Lights.
	FT-TL-GSMJR-QUAD-KIT-BLUE-B	Complete Set Of 2 Quad Tail Light Black Housings. Includes Stop/Tail, Turn, Backup, & Blue Guardian Jr Warning Lights.
	FT-TL-HVC-GSMJR-QUAD-KIT-RED-B	Complete Set Of 2 Quad Tail Light Black Housings. Includes Stop/Tail, Turn, Backup, & Red "Smart" Guardian Jr Warning Lights.
	FT-TL-HVC-GSMJR-QUAD-KIT-AMBER-B	Complete Set Of 2 Quad Tail Light Black Housings. Includes Stop/Tail, Turn, Backup, & Amber "Smart" Guardian Jr Warning Lights.
	FT-TL-HVC-GSMJR-QUAD-KIT-BLUE-B	Complete Set Of 2 Quad Tail Light Black Housings. Includes Stop/Tail, Turn, Backup, & Blue "Smart" Guardian Jr Warning Lights.
	P-GSMJR-BOBEZEL	1 Guardian Jr Blackout Bezel.
	P-GSMJR-BOBEZELKIT	1 Guardian Jr Blackout Bezel With Foam Perimeter Gasket & Mounting Hardware.
	FT-TL-GSMJR-TRIPLE-HO-B	Individual "Triple" Bezel Kit. Foam Perimeter Gasket. Mounting Hardware. Black Housing Only. No Lights.
	FT-TL-GSMJR-QUAD-HO-B	Individual "Quad" Bezel Kit. Foam Perimeter Gasket. Mounting Hardware. Black Housing Only. No Lights.
	 P-4X6-GSMJR-PLATE	Guardian Jr Headlight Area Mounting Bracket.

BG2S KEY FEATURES

The race for the most light is over. In today's digitally connected world full of distracted drivers, it's more important to use the right type of light in only the correct areas. With the BG2S, every module has the ability to engage spot, flood, scene, or colored lights independently. This means you can focus on the big picture of the scene and control the white lighting, warning lighting, and traffic director functions from one interconnected system.

MARKER LIGHT OPTION

Add an additional circuit with amber LEDs to select modules to function as marker lights (available with all BG2S lighting packages).

TRAFFIC DIRECTOR OPTION

Add an array of amber LED circuits to your BG2S to create a synchronized traffic indicator across a single (Smart) or multiple (Smart Multi-System) BG2 light fixtures available with Smart and Smart Multi-System BG2 lighting packages.

OR

WARNING LIGHT OPTION

Add an array of colored (red, blue, or amber) LED circuits to your BG2S to create a synchronized warning light across a single (Smart) or multiple (Smart Multi-System) BG2S light fixtures (available with Smart and Smart Multi-System BG2 lighting packages).

GLOW MODE

Engages the scene BG2S lighting circuit to produce a soft, downward facing glow that is suitable for non-mission critical service calls (available on any smart fixture or system).

GO MODE

Engages spot, flood, and scene BG2S lighting circuits simultaneously with MAX intensity that is suitable for mission critical service calls (available on any smart fixture or system).

CRUISE MODE

Engages colored LED circuit only with low-intensity (available with Multi-System BG2S Package only).

CUSTOM TOOLED MOUNTING BRACKET FOR ANY CAB

Correct placement on the apparatus is key to minimize shadowing. Our BG2S has optimal placement on the edge of the apparatus body, with its custom-tooled extrusion matched to the installation location. No fabricating, cutting, or thinking are required. Just choose the correct extrusion, mount the track, and send the truck down the road. Choose your chassis brand:

BG2 MODULES ➤ BRACKET ➤ CAB

MODULAR DESIGN

The building block and backbone for this system is a 4" wide light module with a variety of circuits packed inside. Each module is attached to a custom extrusion and shares power through our innovative bridging pin connectors. The modular design allows for sizes ranging from a single module wide up to the full length of the apparatus.

DIMENSIONS

BG2S 4" MODULE

VOLTAGE RANGE	9-32V DC
MAX POWER CONSUMPTION	32 WATTS
RAW LUMENS PER MODULE	3,400
OPERATING TEMP. RANGE	-40°F TO 176°F
INGRESS PROTECTION RATING	IP67/69K
DIMENSIONS	3.544" x 3.937" x 4.606"

BG2S USER INTERFACE PANEL (UIP)

CUSTOMIZABLE LIGHTING CONFIGURATIONS

FT-BG2S-UIP-001

KEY FEATURES

- Control a Full Truck of BG2S Lights from One Panel
- Install Multiple Panels to Control System From Multiple Locations
- Active Load Management
- Software Configurable

THE ULTIMATE CONTROL PANEL

The BG2 Smart lighting system is a solution for firefighters that makes it easier and faster to get lights on the scene. It uses optically grouped fixtures, one switch panel location, and customizable button panels to help rapidly put light in any area around the truck. You can have up to four User Interface Panels installed in different areas of the truck so you can easily adjust the lighting no matter where you are on the truck.

Active load management is a unique feature of BG2S systems that ensures the alternator's power matches the amount of power being drawn from the battery. This prevents the truck from shutting off and having to work in the dark. The User Interface Panel senses the amount of power being drawn and will dim the lights when necessary.

OTHER BG2S CONTROLLER OPTIONS

STANDALONE CONTROLLER P/N: FT-BG2S-SAC-001

When you are using a single BG2S fixture, the Standalone Controller gives you the ability to control the fixture using 13 pre-selected input pins.

SYSTEM MANAGER P/N: FT-BG2S-SM-001

When controlling multiple BG2S fixtures on one truck, a single System Manager connects to all of the fixtures and gives you the ability to program up to 13 user-selectable system inputs.

BROW LIGHTS

46" - 83" LOW-PROFILE LIGHT FIXTURES

KEY FEATURES

- **OPTIONAL MARKER LIGHTS (DOT COMPLIANT)**

Each FireTech® Brow Light has the option of integrated DOT compliant marker lights. These allow you to combine six to seven fixtures into one, while maintaining DOT compliance.

- **ADJUSTABLE MOUNTS ALONG BODY**

Using our patented rail mounting foot, the FireTech brow lights can be securely attached to the cab every 12-18 inches, preventing the housing from flexing and preserving fixture integrity over time.

- **ALL ALUMINUM CONSTRUCTION**

FireTech brow lights are manufactured from a solid billet of aluminum which offers superior structural rigidity and thermal dissipation.

DOMINATE THE SCENE WITH FIVE LIGHTS IN ONE

FireTech Brow Lights give you the right type of lighting for the leading edge of your apparatus cab. By combining a long distance spot beam with multiple flood beams, your apparatus will have both range and coverage.

GUARDIAN® SERIES SURFACE-MOUNTED SCENE LIGHTS

KEY FEATURES

- Industry Standard Sizes
- Multiple Output Options
- Widespread Precision Optics

MORE LIGHT WHILE DRAWING LESS POWER

The Guardian Elite produces as much measurable light as other fixtures in the fire industry that advertise 20,000 lumens of output. However, the Guardian Elite produces that light using close to 90 watts (7.5A) LESS power per fixture, at 12V DC. What does this mean for you? In the world of modern electronics, the capacity of the 12V chassis electrical system is often quickly consumed. When building a truck with lots of DC loads, you will be less likely to experience amperage load chart or electrical system limitations due to the scene lighting package using an ultra-efficient fixture like the FireTech® Guardian Elite!

Less Power = Less Heat. By keeping the circuit temperature low, the FireTech Guardian Series can offer sustained light output regardless of runtime on your incident.

GUARDIAN OPTIONAL ACCESSORIES

RETROFIT GASKET ADD RGKIT TO THE END OF P/N

For replacing legacy fixtures that had a different sized cutout/bolt pattern. Covers old or oversized holes in the apparatus body.

BEZEL DELETE GASKET ADD -BDKIT TO THE END OF P/N

Allows for the installation of Guardian/Guardian Elite Scene Light without the chrome bezel for a reduced mounting profile.

LIGHT TOWER FIXTURES

LIGHT TOWER FIXTURES

WHY CHOOSE FIRETECH LIGHTS IN YOUR LIGHT TOWER

- Symmetrical optics put more light on target
- Higher luminous efficacy means less energy consumed
- Superior warranty covers you for life
- Available in AC or DC

SHAPE OF LIGHT MATTERS

HiViz LED Lighting® designs purpose-built fixtures for light tower applications. Traditional LED scene lights project light down and out, which works great when fix-mounted to the body of a truck. However, when traditional fixtures are tilted down (like on a light tower), the majority of light generated (lumens) ends up on the roof of the apparatus. If the fixtures are tilted backwards, the down-angled optics end up shining up and the beam ends up totally useless to the firefighter. Choosing FireTech® symmetrical optics on light towers will ensure that every lumen created at the source is converted into useful lux on target.

FT-WL-X-9--***

**-OPTICS (F, FT) *-HOUSING COLOR (B, W)

9 LED WORK & AREA LIGHT

KEY FEATURES

- Compact size
- Patented thermal technology to prevent overheating
- Can withstand vibration up to 21Grms
- NFPA 1900 2024 edition compliant at the tip of an aerial

WHY CHOOSE THE WL-X-9?

The FT-WL-X-9 is a 63 watt LED work light designed for use in the fire industry. It meets the minimum NFPA 1900 (2024 revision) illumination requirement for a single 12V LED aerial tip light. This fixture is designed with our patented intelligent active thermal management LED driver which prevents the circuitry from overheating, regardless of the fixture's operating environment. Like the rest of the FireTech® products, the FT-WL-X-9 is backed by our Advance Exchange Lifetime Warranty.

PIXEL LADDER LIGHT

THE MOST VERSATILE AERIAL LIGHT EVER CREATED

KEY FEATURES

- Indicate Key Aerial Statuses
- Support up to 5 Ladder Sections
- Choose Any Color/Mode

FT-PXL-61

LIMITLESS FUNCTIONALITY

Adding the Pixel Ladder Light to your fire apparatus aerial device brings a whole new level of sophistication. Each LED in the system is individually controlled by our System Manager, and gives you the ability to choose from a variety of functions on-the-fly. These functions can be solid colors to illuminate the ladder rungs or can be tied to a variety of functions* to indicate certain aerial device statuses. These can include things like flashing when the aerial is in motion, changing colors to indicate when certain load limits are reached, or visually indicating emergency-evacuation or water flowing.

In addition to functionality associated with firefighting, we know aerial devices are often used in parades or community support functions. Supporting the local high school on game night? Fly the school colors! Celebrating Breast Cancer Awareness Month? At the tap of a button, turn the aerial Pink! You can even choose things like "Rocket" or "Twinkle" or "American Flag" all without ever losing the primary function of being the best darn aerial rung light ever produced for a fire apparatus.

CHOOSE ANY COLOR

The system manager allows for user-programmable selection of any "solid" color or combination of colors (white, red, blue, green, orange, pink, rainbow, red/white/blue, etc.).

CHOOSE YOUR FLASH PATTERN

Program any input wire to act as a flashing indicator. This can be wig/wag, scrolling, or blinking and can be used to indicate a variety of aerial conditions.

CHOOSE THE INTENSITY

The entire system is dimmable and can be configured to come on at a variety of intensities.

AVAILABLE FUNCTIONS

FULL

Entire light strip on. Color can be any RGB value or white.

WIGWAG

Even/odd groups of the light strip flash on and off at a selected rate.

WIPE

LEDs incrementally turn on going up/down the light strip at a selected rate, creating the effect of lights “wiping” up/down the ladder.

FLASH

Entire light strip flashes on and off at a selected rate.

RAINBOW

Entire light strip turns on and flows rainbow colors up/down the ladder.

TWINKLE

Random LEDs along the light strip twinkle on and off at a selected rate, ramping up in brightness to the “full” state and then back down during the twinkle duration.

PIXEL LADDER LIGHT STRIPS	
VOLTAGE RANGE	9-32V DC
AMP DRAW (@12V)	.78A
OPERATING TEMP.	-40C TO 60C
INGRESS PROTECTION RATING	IP67 AND IP6K9K
DIMENSIONS	60.94" x 0.85" x 0.39"

PIXEL CONTROLLER | FT-PXL-SM-001

The Pixel Controller (sold separately), otherwise known as the “System Manager,” has 10 user-programmable input wires. These wires can be assigned to any of the above functions or colors. Apparatus manufacturers can then assign switches or outputs from their electrical system to energize any of the 10 pre-selected functions.

Installation of this product requires engineering support from both the apparatus manufacturer and the FireTech team. Training will be provided to any interested apparatus OEM at no cost. This product may or may not be compatible with certain applications or aerial devices. Custom programming, functionality, and integration support are available to apparatus OEMs.

PIXEL CONTROLLER	
VOLTAGE RANGE	9-32V DC
OPERATING TEMP.	-40C TO 60C
INGRESS PROTECTION RATING	IP67 AND IP6K9K
RS4-85 BAUD	19,200
DIMENSIONS	4.680" x 5.240" x 1.420"
HARNESS CONNECTORS	DEUTSCH DTM06-12SA + DTM06-12SB

LASER CANNON

PRECISION LASER LIGHTING TECHNOLOGY

KEY FEATURES

- Daytime visible class 3b laser
- High intensity spherical-type optic
- Compact design

FT-LZC2-4-B

VISIBLE IN BROAD DAYLIGHT

The major problem the laser cannon addresses is aiding in outrigger placement even during daytime. The high intensity laser emitter and spherical-type optic focuses the laser beam with so much intensity that even during the brightest day the light beam is still visible to the operator.

DIMENSIONS

FIELD SUPPORT TOOL

UPDATING SMART LIGHTS

FT-FIELDSUPPORTTOOL

KEY FEATURES

- Configure “smart” products
- Diagnose and transmit trouble areas
- Receives updates from HiViz engineering as features are released

FIELD SUPPORT TOOL

FireTech® “Smart” products like our Pixel Ladder Light, BG2 Smart Lighting System, HiViz Connect™ warning lights, and OMEN™ warning lightbar all receive programming over wire. This tool allows you to configure these products as well as install software updates as they become available. This tool is also extremely helpful in diagnosing problem areas, even connecting back to the HiViz engineering team to “talk to your truck” and see exactly what sort of messages are being sent/received by the lighting system.

This tool is NOT required to use our systems, only to configure it. As such, training is required and this tool is restricted to bonafide dealer, OEM, and up-fitter partners who are in good standing with HiViz. If you are an end-user looking to make updates to your system, contact HiViz and our team will provide more information about shipping a loaner field support tool or scheduling a visit from a qualified HiViz smart product technician.

TELLING THE STORIES OF FIRST RESPONDER OWNED BUSINESSES

A typical first responder shift: 24 hours on, 48 hours off. This schedule has sparked the entrepreneurial spirit of many, fueling the growth of new businesses small and large. We're here to tell those stories.

The Will-Burt Company, headquartered in Orrville, Ohio, USA, is the world's premier manufacturer of mobile telescoping masts, towers and pan and tilt positioners. We offer virtually every mobile payload elevation and integration solution for defense, government, first responders, cellular and mobile, broadcast, energy production and other markets. Will-Burt also offers contract manufacturing, metal fabrication, powder-coating, and rapid prototyping services. Will-Burt is an international company with offices and manufacturing in the USA, England, and Germany along with offices in Singapore and a joint venture in Turkey. All Will-Burt Company manufacturing locations are backed by a certified ISO 9001:2015 Quality Management System. Incorporated in 1918, Will-Burt is 100% employee-owned and is classified as a small business.
