nightscan® *Because You Need Light Every Night*

Why You Need a Night Scan Light Tower

Safety is the number one requirement when answering a call and nighttime operations create an even bigger challenge. Night Scan light towers create a safer work environment by lighting the scene from above, like natural daylight.

Overhead lighting reduces glare for oncoming traffic and does not blind the crew. Night Scan light towers allow you to customize light intensity and coverage by stopping the tower at any height before it is fully extended. Installation flexibility is delivered with three lightweight options; roof-mounted to the apparatus, internally installed extending through the roof or mounted externally to the vehicle.

All Night Scan light towers meet or exceed all NFPA 1901-16 requirements. The Made in the USA, maintenance-free design operates in nearly any environment – from dusty, hot deserts to -22°F, snowy conditions. The Powerlite dual-tilt light option allows you to illuminate 360° of the scene by equally distributing light front and back.

The nearly limitless options of Night Scan ensures that it will meet the needs of your department. Hilly terrain or tall buildings might require a light tower of 30 feet with six high-powered lamps. Small vehicles might be better suited with a 3.25 foot Night Scan Chief model with two lamps. The towers can accommodate any vehicle's electrical system with either LED or Halogen lamps from the best brands – FRC, Whelen and Will-Burt.

The always upright design of Night Scan provides the best platform for adding optional strobe lamps or video cameras. Video cameras can be used for scene recording, training or remote monitoring of operations. Will-Burt has a full range of video options from simple, fixed lens cameras to high-definition and thermal imaging PTZ cameras.

Choose Night Scan and operate under the safest nighttime conditions, because You Need Light Every Night!

Selecting the Night Scan That is Best For You

1. Review your total height requirements. If your terrain is hilly or there are tall trees or buildings, you might want a taller tower, up to 30 feet. Remember that the mounting location will add height as well. Night Scan platforms are available from 3.25' to 30'.
2. How much space is available for the light tower? If ample roof space is available; a lightweight, compact, folding, roof-mounted tower is a good option. If space is tight, a through the roof vertical light tower or side mounted vertical tower might be the best option.
3. How much light do you need? 2, 4 or 6 LED or halogen lamp options are available. Total lumens can reach 220,000.
4. What type of electrical system is available? 12 and 24 DC options are available for vehicle electrical systems and 120 and 240 AC options are available for vehicles that have on-board generators.
5. Select the tower remote control that is best for your needs. Wired controllers, panel-mount controllers and wireless controllers are available.
6. Last, what options are needed? Warning strobes and video cameras are available on most Night Scan light towers. See page 12 for the tower and light options or visit <http://www.willburt.com/support/support-center/ez-spec/> for options and downloadable specifications.

NIGHT SCAN® LITE

The All New Night Scan Lite is a compact, folding light tower that merges cutting edge LED light technology with proven mechanical design to deliver fast and reliable scene illumination. The Night Scan Lite is self-contained and is energy efficient – no generator is needed. The lightweight design assures that the light tower can be installed on nearly any flat vehicle or trailer surface.

ESSENTIAL FEATURES

- Rugged, weatherproof design
- Remote light positioning
- Lights IP69k water-proof
- 2 year warranty
- Safety LED look-up light
- Wired hand-held controller
- No routine maintenance
- CE Certified / NFPA Compliant
- Patent pending

Extends 2 meters above the emergency service vehicle

Provides over 384 sq. meters of safe work area at 30+ lux

Dual optics for near and far illumination

Can be installed on nearly any flat vehicle or trailer surface

The wired controller allows for full 360° pan & tilt remote light positioning

Tested and proven to be reliable in extreme environments

NIGHT SCAN® CHIEF

The Will-Burt Night Scan® Chief is a roof-mounted, fold-down light tower which requires no interior vehicle space. It is typically used on medium-size rescue, pumper rescue, service and utility vehicles. The Night Scan® Chief features a self-contained air system (no external air supply needed) and is available with all DC (12V/24V DC) operations in which generator or inverter is not required.

Night Scan® Chief with Profiler narrow light fixture option

NIGHT SCAN® POWERLITE

The Will-Burt Night Scan® Powerlite is a roof-mounted, fold-down light tower which requires no interior vehicle space. It is typically used on heavy-rescue vehicles, mobile command centers and airport ARFF vehicles. Opposable light fixtures provide equal lighting forward and backward at the same time - 360° of light. Delivering up to 220,000 lumens, the Night Scan® Powerlite is ideal on any vehicle where maximum light is required. The Powerlite 3.0 and 4.5 can be elevated with truck air or optional on-board compressor. The 2.3 comes with a built-in compressor.

*Varies depending on light package - 125% NFPA Safety Factor

NIGHT SCAN® XTREME

The Will-Burt Night Scan® Xtreme is a roof-mounted, fold-down light tower which requires no interior vehicle space. It has been designed for applications where maximum height is required, such as hilly terrain, locales with mature trees or urban areas with tall buildings. Opposable light fixtures provide equal lighting forward and backward at the same time - 360° of light. The Night Scan® Xtreme can be elevated with truck air or optional on-board compressor. When the situation requires maximum elevation, Night Scan® Xtreme is the light tower you need.

NIGHT SCAN® VERTICAL COMPLETE

The Will-Burt Night Scan® Vertical Complete is a vertically mounted light tower which was created to be installed externally to the side or rear of a vehicle. This light tower includes an on-board compressor for elevation and requires no truck air. Used for elevating lights and/or cameras, it is perfect for smaller vehicles where space is limited. Measuring less than 6 inches (16 cm) deep, it can even fit between the cab and box. The compressor box can be placed below or beside the mast to suit your specific vehicle requirements.

NIGHT SCAN® VERTICAL LIGHT TOWER

The Will-Burt Night Scan® Vertical Tower is a vertically mounted light tower which may be installed internally or externally to the side or rear of a vehicle. Used for elevating lights and/or cameras, it is typically used on heavy rescue vehicles, full-size mobile command centers, airport ARFF vehicles and large wreckers. Delivering up to 220,000 lumens with the Sirion light package, the Night Scan® Vertical Light Tower is ideal on any vehicle where maximum light and height are required.

LIGHTING GUIDE

Will-Burt offers a variety of light options from the top brands in lighting to meet our customers' specific needs. Virtually every electrical system requirement can be met with our lighting solutions. Lighting packages are available in 12 and 24 volt DC and 120 and 240 volt AC. The most sophisticated and long lasting LED lighting available in the market today is offered in low power consumption and high lumen output arrangements. Halogen packages are available for applications where traditional, lower initial cost lighting is needed.

Lighting Comparison	LED (Light Emitting Diode)	Halogen
Although LED lights are more expensive than halogen, LEDs do not require a costly generator. LEDs offer the lowest lifetime cost.	LED lamps are the most efficient light source available, producing more lumens per watt than any other type. LEDs also produce instant light that is closer to daylight than HID or Halogen, which can make a scene appear brighter. LEDs are the longest lasting source of light because they do not use a filament to produce light.	Halogen lamps provide high lumen output and instant light at a low price. However, Halogen bulbs do consume the most power per lumen and also have the shortest life expectancy, requiring bulb replacement throughout the life of the apparatus. Halogen lights typically require a generator.
Lumen Range / Lamp	8,000 - 28,000	10,500 - 35,000
Average Expected Life	50,000 hours	250 hours

NIGHT SCAN® SIRION

The Most Powerful Night Scan...EVER!

Sirion LED lamps deliver maximum illumination on Night Scan light towers. These scene lights were designed to optimize the inherent benefits that Night Scan light towers have over the competition. A mix of short and long-range optics insure that the proper level of illumination is provided whether the tower is fully extended to cover the maximum area for a large and diverse scene or lowered to provide intense light on a focused situation.

ESSENTIAL FEATURES

- Consistent and constant illumination from the beginning of the mission until the end is assured by an electronic thermal management system and top bin LEDs
- Water-proof and designed for high-vibration applications
- Compact and highly efficient
- 10 year warranty

The three major areas of a nighttime scene are illuminated by Sirion Triple Coverage optics technology:

- The critical work area is illuminated by focused spot light optics
- The apparatus is covered by short-range flood lamps
- The entire scene is evenly illuminated by long-range flood lights

Sirion available on the following light towers:

Night Scan Powerlite: 3.0 and 4.5
 Night Scan Vertical Powerlite: 17', 20', 25' and 30'

120 / 240 AC - Total power 1,200 watts
 120 VAC / 11 amps, 240 VAC / 5.5 amps

Effective lumens are a true measure of real world light output of a fixture.
 Raw lumens don't tell the entire story. Bigger numbers don't always mean more light.

Sirion Light Package

Raw Lumens: 220,000 / Effective Lumens: 122,340
 30 LUX of light is considered safe for a work area by NFPA

Now Available in narrow Profiler design

NIGHT SCAN® LED LAMPS

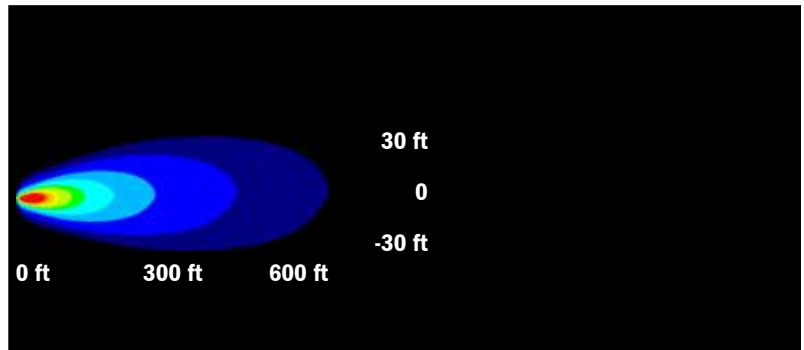

The Night Scan family of LED lamps are the only LED scene lights designed specifically for Night Scan light towers. These lamps are engineered to optimize the inherent benefits of Night Scan towers, producing more light, using less power, and covering larger areas. Consistent illumination from the beginning of the mission until the end is assured by an electronic thermal management system, large heat sinks, and top-bin LEDs. Three Night Scan lamp options ensure that you will have the best possible illumination to meet your requirements.

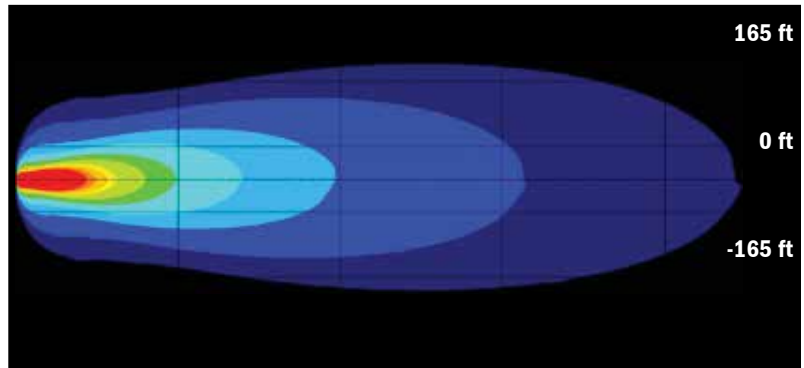

Model	X200	
Raw Lumens	20,000	
Effective Lumens	11,323	
Optics	Double - Spot / Flood	
Water-Proof Rating	IP69k - high-pressure spray, submersible	
Active Thermal Management	Yes	
Warranty	5 Years	

Model	XL200	
Raw Lumens	20,000	
Effective Lumens	11,362	
Optics	Double - Spot / Flood	
Water-Proof Rating	IP69k - high-pressure spray, submersible	
Active Thermal Management	Yes	
Warranty	10 Years	

Model	Sirion	
Raw Lumens	110,000	
Effective Lumens	61,170	
Optics	Triple - Spot / Short Flood / Long Flood	
Water-Proof Rating	IP69k - high-pressure spray, submersible	
Active Thermal Management	Yes	
Warranty	10 Years	

VALUE-ADDED ACCESSORIES

STROBE LIGHTS

Will-Burt lighting solutions include reliable, compact strobe lights for added visibility and safety. Strobes feature a rugged, impact-resistant polycarbonate dome and base, exceptional fiber optics, and a double-flash power supply that automatically adjusts to function at any voltage – from 12V to 24V DC. They meet SAE J1318 Class 3 specifications and are available in LED beacons and a variety of colors: amber, blue, clear, red and green.

REMOTE CONTROLLERS

Will-Burt offers wired and wireless full-function, simple-to-use remote controls. Designed for rugged environments and gloved hands, they can withstand the harshest weather and operating conditions.

All controllers have an emergency stop button for immediate reaction to unexpected situations. All controllers have a one button auto-deploy and auto-stow function to simplify tower operation and they also include a digital display for status feedback.

Choose from our handheld tethered models or a panel-mount version. A full-function, wireless / rechargeable remote-control system with 300' range is available for all Night Scan models. The wireless remote can also be paired with an optional tethered remote control for the ultimate in flexibility and peace of mind operation.

D-TEC® LIVE POWER LINE DETECTION SYSTEM

The D-TEC® safety system provides overhead power line detection and above-the-mast illumination. The built-in high voltage, electromagnetic and electrostatic field detection system automatically stops mast extension, providing added protection for the operator and equipment. The D-TEC® safety system is available on powerlite and vertical telescoping masts.

D-TEC® SAFETY FEATURES:

- Dual threshold AC alert, E-Field (current) and H-Field (magnetic)
 - AC voltage detection range starting at 110VAC/60Hz
- Senses both AC current and AC voltage
- 3-axis field detection
- LED Look-Up Light
- Audible alerts
- Alphanumeric LED display
- Built-in Emergency Bypass
- Expanded self-testing features
- Factory pre-set siren and verbal warning in English and Spanish

NIGHT SCAN® SPOT

The Night Scan Spot is a rotatable, remote-controlled LED light. The wireless remote allows the light to be remotely adjusted by the operator.

With a vertical tilt up of 70° and 45° tilt down and an infinite horizontal rotational range (clockwise and counterclockwise), The Night Scan Spot from Will-Burt allows for pan-tilt motion. Also equipped with a flashing alert feature, the remote-controlled LED light can be used to warn approaching motorists or pedestrians of potential hazards or help is needed. It can also be used with service vehicles to alert the on-coming vehicles there are people at work, and more.

SPECIFICATIONS

Lumens	6,720
Operating Voltage	10 - 30VDC
Power Consumption	80W
Maximum Distance for Operating Remote Control	Up to 130 ft.
Weight	7 lbs. (3.2KG)
Remote Control Battery	(1) 23A battery

nightscan spot

NIGHT SCAN® SCOUT

Night Scan Scout floods your rescue scene with powerful LED light that lets you get the job done quickly and safely. Scout delivers the flexibility to be mounted almost anywhere on your mobile platform; roof, roll-bar, crane, boom, nearly any solid surface. Scout is a 12 volt system powered directly from your vehicle, no need for an expensive generator. Two long range wireless remote controls are provided with every light system. Night Scan Scout is an essential tool for nighttime operations.

SPECIFICATIONS

Total Lumens	40,000	
Height	10 in. / 254 mm	
Width	20 in. / 508 mm	
Depth	5.5 in. / 140 mm	
Weight	36.5 lb. / 16.5 kg	
Operating Temperature	-20° C to 50° C / -4° F to 122° F	
IR Rating - Waterproof	Lights: IP69K	Positioner: IP68
Pan Axis (rotation)	400° (±200°)	
Tilt Axis	180° (±90°)	
Maximum Continuous Power	263 watts	
Maximum Running Current	21.9 amps	
Input Voltage	12 VDC - 24 VDC and AC Options	

ESSENTIAL FEATURES

- **Direct 40,000 lumens of light exactly where you need it**
 - Control both rotation and tilt angle of lights
- **2 wireless long-range remote controls**
- **Install anywhere**
- **Fits any size vehicle**
- **Water-proof / Weather-proof**
- **12 volt operation**

MOBILE VIDEO SYSTEMS

Will-Burt Night Scan® Light Towers deliver the capability of camera mounting, with or without lights. A camera, elevated to a height from 3.25 ft. to 30 ft. above the vehicle roof, allows ground personnel to survey an emergency scene quickly and efficiently. In addition, the system offers real-time monitoring and surveillance for accurate records and documentation. Will-Burt has several camera, DVR, monitor and software packages that fit a variety of needs. Our video solutions experts can also design a customized package to fit your specific requirements. Below is a sample of our video solutions.
