RECHARGEABLE AND PORTABLE LIGHTING SOLUTIONS

The Will-Burt Company is the proud, exclusive distributor of NightSearcher rechargeable lighting products. NightSearcher was established in 1989 and has provided the world with portable rechargeable lighting solutions that are dependable, durable, and easy to use. Applications of NightSearcher products range through multiple markets including fire, law enforcement, towing, security, construction, mining, and more. All products are powered by no maintenance lithium-ion or LFP batteries providing longevity and reliability in temperatures from -4° to 140°F , as well as containing a battery management system to protect against overcharging. While NightSearcher is located in the United Kingdom, Will-Burt holds stock of core products within the United States to ensure fast delivery.

NightSearcher professional products are carefully designed and manufactured to the highest standards to ensure the reliability and durability our customers need. This is why we offer a 3-year standard warranty on all manufacturing defects and 1-year warranty on all rechargeable batteries from the date of purchase.

Will-Burt will be adding additional rechargeable lighting products to our line of innovative products for roadside emergencies. We are now the Master Distributor of LED scene lights from FRC. Founded in 1968, Fire Research Corporation (FRC) manufactures more efficient lights that use less power and provide more light with longer life. In addition, we offer Pi-Lit sequential warning lights - Smart Flares. Pi-Lit combines patented communications technology with brilliant LEDs and Li-Ion rechargeable batteries that provide a safe and reliable safety system.

Furthermore, Will-Burt's line of portable lighting solutions provide LED scene lighting for emergency recovery operations, towing sites, and other job sites to improve the productivity and safety of nighttime operations. The powerful and efficient LED lights illuminate a wide area while being powered by the vehicle. As added flexibility, several mounting options are available either by truck or tripod, increasing portability from site to site.
